Fierro, R. Central limit theorems for local martingales taking values in the space of tempered distributions. *Brazilian Journal of Probability and Statistics*. Vol. 2, Nº2, pag. 81-90. 1988.

Fierro, R. Existence and Uniqueness of a Martingale Problem in $D(\mathbb{R}_+, \mathcal{S}')$. *Statistics and Probability Letters*. Vol. 9, Nº4, pag. 357-359. 1990.

Fierro, R. Domains of Attraction for Semimartingales taking values in the Tempered Distributions Space. *Journal of Theoretical Probability*. Vol. 3, Nº1, pag. 31-49. 1990.

Fierro, R. On the weakening of a Kushner-Clark condition for sequential compactness. *Revista de Matemáticas Aplicadas*. Vol. 14, pag. 1-8. 1993.

Figuroa, G. y Fierro, R. Asymptotic Analysis for the Number of Subgraphs of a Given Size in Temporal Random Graphs. *Proyecciones*. Vol. 12, Nº1, pag. 1-11. 1993.

Fierro, R. Random Fluctuations for Independent Markovian Systems. *Notas de la Sociedad de Matemáticas de Chile*. Vol. 12, pag. 7-13. 1993.

Fierro, R. Central Limit Theorem and Large Deviation Principle for a Simple Stochastic Epidemic Model. *Selected Topics on Stochastic Modelling*. Eds. Gutiérrez, R. and Valderrama, M.J. (World Scientific Publ. Co.). pag. 88-106. 1994.

Fierro, R. A Large Deviation Principle for an Epidemic model. *Brazilian Journal of Probability and Statistics*. Vol. 1, Nº 1, pag. 1-7. 1994.

Fierro, R. Large Sample Analysis for a Stochastic Epidemic Model and its Parameter Estimators. *Journal of Mathematical Biology*. Vol. 34, Nº 8, pag. 843-856. 1996.

Fierro, R., Matínez S. y San Martín, J. Limiting conditional and conditional invariant distributions for the Poisson process with negative drift. *Journal of Applied Probability*. Vol. 36, Nº4, pag. 1194-1209. 1999.

Fierro, R. y Torres, S. The Euler Scheme for Hilbert Space Valued Stochastic Differential Equations. *Statistics and Probability Letters*. Vol. 51, Nº3, pag. 207-213. 2001.

Fierro, R. Asymptotic Normality of Estimates for a Class of Stochastic Epidemic Models. *Brazilian Journal of Probability and Statistics*. Vol. 16, Nº 2, pag. 187-203. 2002.

Fierro, R. A test of goodness of fit testing for stochastic intensities associated to counting processes. *Statistics and Probability Letters*. Vol. 64, Nº2, pag. 287-292. 2003.

Fierro, R., Martínez, C. y Morales, C. The Aftermath of the Intermediate Value Theorem. *Fixed Point Theory and Applications*. Vol. 3, pag. 243-250. 2004.

Fierro, R., Martínez, C. y Morales, C. Carathéodory selections for multivalued mappings. *Nonlinear Analysis: Theory, Methods and Applications*. Vol. 64, Nº 6, pag. 1229-1235. 2006.

Fierro, R. Test of homogeneity for some population models based on counting processes. *Communications in Statistics-Theory and Methods*. Vol. 37. Nº1, pag. 46-54. 2008.

Fierro, R. y Torres, S. A Stochastic Scheme of Approximation for Ordinary Differential Equations. *Electronic Communications in Probability*. Vol. 13. pag. 1-9. 2008.

Guiraud, P., Leiva, V. y Fierro, R. A Non-central Version of the Birnbaum Saunders Distribution for Reliability Analysis. *IEEE Transactions on Reliability*. Vol. 58. Nº1, pag. 152-160. 2009

Fierro, R., Martínez, C. y Morales, C. Fixed Point Theorems for Random Lower Semi-Continuous Mappings. *Fixed Point Theory and Applications*. doi:10.1155/2009/584178. 2009.

Fierro, R. A Class of Stochastic Epidemic Models and its Deterministic Counterpart. *Journal of the Korean Statistical Society*. Vol. 39, Nº4, pag. 397-407. 2010.

Fierro, R., Martínez, C. y Morales, C. Random coincidence theorems and applications . *Journal of Mathematical Analysis and Applications*. Vol. 378, Nº1, pag. 213–219. 2011.

Fierro, R y Tapia, A. Weak Conditions for Existence of Random Fixed Points. *Fixed Point Theory*. Vol. 12, Nº1, pag. 83-90. 2011. Testing homogeneity for Poisson Processes. *Revista Colombiana de Estadística*. Vol. 34, Nº3, pag. 421-432. 2011.

Fierro, R. Asymptotic Distribution of Martingale Estimators for a Class of Epidemic Models. *Statistical Methods and Applications*. Vol. 21, Nº2, pag. 169-191. 2012.

Fierro, R. Discrete-Time Stochastic Epidemic Models and Their Statistical Inference, *Stochastic Modeling and Control*, Ivan Ganchev Ivanov (Ed.), ISBN: 978-953-51-0830-6, InTech, DOI: 10.5772/39271. pag. 253-278. 2012.

Fierro, R., Leiva, V., Ruggeri, F. y Sanhueza, A. On a Birnbaum-Saunders distribution arising from a non-homogeneous Poisson process. *Statistics and Probability Letters*. Vol. 83, Nº4, pag. 1233-1239. 2013.

Fierro, R. Approximation of some discrete-time stochastic processes by differential equations. *Haceteppe Journal of Mathematics and Statistics*. Vol. 43, Nº6, pag. 1035-1046. 2014.

Fierro, R., Leiva, V. y Moller, J. The Hawkes process with different exciting functions and its asymptotic behavior (junto con). *Journal of Applied Probability*. Vol. 52, Nº1, pag. 37-54. 2015.

Fierro, R., Leiva, V. y Balakrishnan, N. Statistical inference on a stochastic epidemic model (junto con Leiva, V. y Balakrishnan, N.). *Communications in Statistics-Simulation and Computation*. Vol. 44, Nº9, pag. 2297-2314. 2015.

Fierro, R. Functional limit theorems for the multivariate Hawkes Process with different exciting functions. *ALEA-Latin American Journal of Probability and Mathematical Statistics*. Vol. 12, N°1, pag. 477-489. 2015.

Fierro, R. Fixed Point Theorems for Set-Valued Mappings on TVS-Cone Metric Spaces. *Fixed Point Theory and Applications*. 2015:221 doi:10.1186/s13663-015-0468-1. 2015.

Fierro, R. A noncompactness measure for tvs-metric cone spaces and some applications. *Journal of Nonlinear Sciences and Applications*. Vol. 9, N°5, pag. 2680-2687. 2016.

Fierro, R. Fixed point theorems for set-valued mappings and variational principles in uniform spaces with $\$w\$$ -distances. *Fixed Point Theory*. Por aparecer.

Fierro, R. y Leiva, V. A stochastic methodology for risk assessment of an earthquake when a long time has elapsed. *Stochastic Environmental Research and Risk Assessment*. Por aparecer.

Aguilera, E. y Fierro, R. Weak convergence of a numerical scheme for stochastic differential equations. *Probability and Mathematical Statistics*. Por aparecer.
